

Complete weld quality and process control

Save time
Cut cost
Improve quality

WeldEye® software is easy to use and improves all your steps in welding production

Better process control
Higher quality
Faster production

One solution
complete control

Reduce welding documentation cost by up to 70 %

WeldEye® is the best strategic choice for any organization working with welding in production. It gives control in all processes – including qualifications, reporting, documentation and traceability – and improves customer satisfaction.

This is **WeldEye®**

WeldEye® is a computer program for managing welding production. It covers requirements in welding procedures, welding certificates, testing (Non Destructive Testing/NDT) and process control of your production.

WeldEye® can reduce documentation costs by up to 70 %. It fits all types of organizations with requirements from international standards such as ISO, ASME, AWS.

WeldEye® is the preferred product for several international companies such as **Aker Solutions, Ruukki, Heerema Fabrication Group, U.S. Army, Electric Boat and Lincoln Electric Company.**

WeldEye® supports multiple languages and multiple site installations.

- ▶ **control and traceability** in the production process
- ▶ **better quality**, more accurate, as-built documentation
- ▶ **quicker decisions** based on correct information
- ▶ **time savings** due to improved resource management
- ▶ **easy access** through Internet
- ▶ **real time status** on executed and outstanding production
- ▶ **complete project status** for management
- ▶ **fulfillment** of customer requirements
- ▶ **updated requirements** from international standards
- ▶ **new and innovative** IT technology
- ▶ **re-usage** of existing information
- ▶ **easy re-certification** tool
- ▶ **effective** compilation and recycling of welding procedures
